WASTE OIL TRANSFER UNIT

TPT1300

The waste oil transfer unit is a multi purpose disposal unit to empty your dirty oil from your deep fryer and to also pump the holding tank out into you collection tank. Simply plug the unit into any 240v socket, switch the pump on and place the end of the lance just under the surface level of your oil to empty your fryer. To empty the holding unit simple turn the pump on to discharge and point the end of the lance into your holding tank.

Specifications

Dimensions 1110mm high, 453mm wide, 675mm long.

FILTER MACHINE

FIL1400

To operate, drop oil in to trolley through filter bag, flush/clean out bits from fryer with lance, transfer to used/waste oil container and pump out.

Specifications

Filter trolley: capacity 35 litres.

Flow rate is 22 litres per minute.

Dimensions 650mm long, 530mm wide, 900mm high

Hose length 1400mm.

Both with 240v with caravan socket connection.

Hose length can be customised depending on requirements.

IBC TRANSFER PUMP TROLLEY

TPT1300

Used to pump oil from Bulk Container to the fresh oil transfer unit.

Specifications

Dimensions 270mm wide x 270mm long x 950mm high.

IBC connection to the inlet with NRV.

Delivery nozzle gun on outlet.

Pump speed 40lts per minute.

240v caravan socket power point.

Hose length 1300mm.

IBC CONTAINMENT BUND POWDER COATED STEEL

IBCMB1260

To eliminate the risk of spillage we recommend a IBC sits on a bund. Our Metal IBC Bunded Pallet is fully compliant for storing 1 x IBC bulk container. It is specifically designed for liquids and its tough metal construction will easily handle remote conditions.

Specifications

Bund has a 1140 litre capacity, forklift capable from all sides and made of galvanised metal and powder coated.

Weight 195 kg.

Dimensions 1232mm x 1706mm x 631mm.

IBC TILT STAND – SPRING LOADED IBCTILTSTAND

In Spill pallet accessories/ Drum dispensing and storage/ IBC spill containment bunds

This spring-loaded, heavy-duty IBC tilt stand enables you to dispense every drop of liquid from an IBC (intermediate bulk container) to avoid waste, whilst also preventing any undue environmental or safety hazards.

This highly durable and robust IBC tilt stand has been manufactured in Australia from heavy duty zinc anneal steel.

Specifications

Dimensions 1068mm × 1268mm.

DOUBLE IBC CONTAINMENT BUND – POWDER COATED STEEL

IBCTWINSTEEL

In heavy duty steel spill pallets/ IBC spill containment bunds

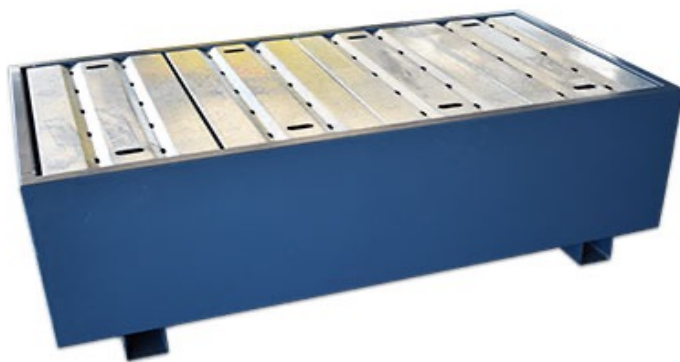

Store up to two IBCs on this powder coated steel IBC bund to contain and capture leaks, drips, and spills. Suitable for use with Class 3 Flammable Liquids.

Specifications

Bund has a 1165 litre capacity, forklift capable from all sides and made of galvanised metal and powder coated.

Weight 262 kg.

Dimensions 1232mm × 2526mm × 471mm.

BUND COVER SOFT YELLOW COVS-SPIBC1

Protect IBC's and drums from environmental damage and prevent rainwater contamination of the bund.

Specifications

Dimensions Approx. 1800mm x 1400mm x 1200mm.

UV stable with high abrasion and tear resistance.

CAN BE CUSTOM - MADE IN RED

DOUBLE IBC CONTAINMENT BUND **SOFT YELLOW** COVF-SPIBC2

These double IBC bund covers have been designed to prevent rainwater ingress into the bund when storing IBCs or bulk boxes outdoors. This in turn reduces the likelihood of any spilled liquid overflowing the bund.

Specifications

Dimensions Approx.
2600mm x 1300mm x 1300mm.

UV stable with high abrasion and tear resistance.

BUND COVER FRAMED COVF-SPIBC1

Protect IBC's and drums from environmental damage and prevent rainwater contamination of the bund.

Specifications

Dimensions Approx. 1800mm x 1400mm x 1200mm.

UV Stable heavy-duty corrosion resistant galvanised steel frame.

DOUBLE IBC CONTAINMENT **BUND FRAMED** COVF-SPIBC2

Protect IBC's and drums from environmental damage and prevent rainwater contamination of the bund.

Specifications

Dimensions Approx. 2600mm x 1300mm x 1200mm.

UV Stable heavy-duty corrosion resistant galvanised steel frame.

YURRAMA WATER

For thousands of years, Indigenous people have been collecting GOOD Water from harsh landscapes. In harsh conditions when rivers and streams have dried, or water has become stagnant and contaminated Indigenous people would dig a YURRAMA in the sand or beside the water source. Digging through the sand to find fresh GOOD water. Giving life to family, friends, and animals.

By purchasing YURRAMA Water you are not only purchasing GOOD Water you are supporting an organisation to provide a better life to those that need Employment and Training to be able to provide greater opportunities for job seekers to find and be supported into Employment.

All YURRAMA water bottles are proudly packaged in recycled clear plastic, reducing our carbon footprint and promoting a circular economy.

Currently available in two sizes 600ml and 1.5 litres bottles.

RED ROAR (LIGHT VEHICLE RED DIRT REMOVER)

Heavy Duty Equipment Cleaner. Introducing RED ROAR: Your Powerful Acid Cleaner, Brightener, and Acid Truck Wash Solution RED ROAR is a robust and versatile product designed to tackle the toughest cleaning challenges in industrial and fleet washing applications. As a thickened foaming acid cleaner and brightener, RED ROAR is formulated to remove stubborn dirt, grease, oils, and various contaminants from a wide range of surfaces. To ensure optimal results, it is recommended to pre-clean surfaces using Exit Grease or other cleaners and degreasers, tailored to your specific needs.

BARC (BITUMEN, ASPHALT REMOVER & CLEANER)

Bitumen, Asphalt Remover & Cleaner. Your Eco-Friendly Solution for Asphalt Removal BARC presents a game-changing environmental solution for removing stubborn bitumen, asphalt, and heavy grease. Unlike traditional solvents, BARC is a highly effective and low-cost option, derived primarily from natural edible plant oils. This unique composition makes it free of volatile organic compounds (VOCs) and other harmful substances, addressing environmental concerns associated with asphalt removal.
